New Graduate Opportunities!!-Avid Solutions

If you are planning to graduate in or May/August/December 2013, we know you must be looking for the right company to grow and develop further. At Avid, we create solutions and automate industrial processes with an outstanding team of talented engineers from a variety of backgrounds. The theories and skills you have learned while in school will be applied while working on real-world manufacturing projects with us.

We are looking for two great engineers to join us in June - December 2013.

GPA: 3.2 or higher

Added Advantage:

- If you have done the same with a process control focus or at least taken several process control senior level courses during your course.
- Having worked as a Co-op engineer or having some internship experience, in any of the process industries.
- May/Aug/Dec ’13 (Peachtree City, Georgia office)- Branch Accepted:
  Electrical/Mechanical/Chemical/ Industrial and Systems Engineering

This is a full time position and visa sponsorship is not available at this time.

At Avid we can give you variety. You will have an opportunity to work in multiple industries (Chemical, Life Sciences, Energy, Automotive, pharmaceutical, biotech, etc.) and learn how our customers automate and control their batch, continuous and discrete processes using different systems and technologies. You will have unique hands-on opportunities, such as visiting and working on-site at different manufacturing facilities.

If you are willing and able to work HARD and learn valuable skills like electrical design, operator interfaces development, PLC and DCS controller programming.
If this excites you and makes you feel that it is a possible career opportunity for you, then submit your resume directly via Tiger Recruiting Link.
